Experience

2016 — 2019

Senior Front-End Developer
Grip Limited (Toronto, Canada)

- Advised clients on optimal technology stacks that best suited their project needs
- United the design and development team through advisement and mentorship of both teams
- Developed custom internal tools to streamline projects and reduce content update times
- Authored and updated documentation to guide colleagues on project workflows
- Volunteered personal time to develop interactive applications to promote internal events and strengthen company culture

2009 — 2016

Front-End Developer
Climax Media (Toronto, Canada)

- Advised clients on the most efficient approaches and implementation of new ideas and features
- Led the front-end development team on Honda.ca, Acura.ca, and other projects for Honda Canada
- Established the foundation for the Honda.ca and Acura.ca component system
- Interviewed and mentored new development talent

2005 — 2009

Designer
Climax Media (Toronto, Canada)

- Led the ideation and design process for new product development
- Designed website, print media, and application concepts
- Championed the process of phasing out Flash in favour of HTML and CSS

Education

2007 — 2008

Digital Media Arts
Seneca College (Toronto, Canada)
